## PREFACE

The General Provisions and all portions of the Standard Specifications, Forms Specifications and Standard Drawings which place any duty or responsibility upon personnel or agencies of the City of Folsom or other public entities are intended for use in those contracts entered into by public entities and administered by the City of Folsom. Any use of these General Provisions and the Standard Specifications, Standard Forms Specifications, and Standard Drawings by any other person, persons, or entity shall not create or imply the assumption of any liability or responsibility by the City of Folsom or any public entity authorized to use these specifications.

Unless otherwise excluded, the Standard Specifications, Section SS-1 through Section SS-125 of these specifications shall apply to all materials and construction methods for all construction work both under the direct inspection of City of Folsom for contracts awarded by public entities and administered and inspected by the City of Folsom, and for those contracts under indirect inspection awarded by other parties for future dedication or incorporation into the public entities' facilities, and for construction of private improvements within public rights of way or easements.

In addition to public contracts, the standard specification section to this document will also apply to private development both for publicly owned and privately own facilities.
